

Note1. A liner meeting the 18 AAC 75 Table D specifications for a long term stockpile (20 mil), will be placed under the entire stockpile. The sump area will be double lined to ensure contaminated water does not seep into the soil below.

Note 2. The bottom of the stockpile will be free of sharp rocks or other sharp objects to protect the liner. In addition the liner will be protected with a 10-oz geofabric above and below the liner.
